

Testing protocol:

- A medical provider will administer the test
- Tests will be conducted in an open-air environment
- Tents will be provided with screens for individual testing privacy
- Please maintain 6 ft. social distancing, in all directions while in line for testing and while waiting for results
- Please ensure that crew who are assigned to work a flight are prioritized to the front of the line. Deadheading crew should be tested last. The testing facility is only available for active assigned, working and deadheading crew who are departing that day to PPT.
- Temperature screening will be conducted prior to the commencement of the test
- If you have had nasal surgery or nasal trauma in the past, you must disclose that information prior to performing the nasal swab
- The administered COVID-19 test is a swab to each “mid-nostril” representing the latest in “rapid test” technology. Mid-nostril is defined as 1-1 ½” inside the nasal passage.
- Test results are provided to the crewmember in an expeditious fashion
- The crewmember will be given a paper copy of test with negative result to carry on their person and present upon arrival in PPT. Once negative test results are obtained, crew member may proceed as planned to planning for pilots and the gate for flight attendants.
- If crewmember tests positive, a GoHealth representative will provide the crewmember with a copy of their results and next steps. The employee must follow United’s current procedures for a positive test as provided.

Note: *The medical provider is required to report any positive test to the public health department and the company.*
